

# Case Study

Client: The University Of Hull  
Project: Hardy Building Biology labs refurbishment  
Main Contractor: S Voase Builders  
Completed: December 2007

The project requirement was to provide a flexible learning space that needed a suitable acoustic movable wall between the laboratory classrooms. The classrooms needed to allow separate examinations to occur simultaneously.

An acoustic pass door was required to allow Laboratory Technicians to set up experiments and equipment.

Specification:

1 No Type 110C Movable Walls  
comprising 9 no panels  
53 dB sound rating  
Top supported  
Grey Melamine  
Acoustic pass door with vision panel
