

Case Study

Client: Toll Gavel Church
Completed: September 2008

The main project was to remove an old Victorian folding partition with a modern alternative.

The function of the partition was to provide the church with a meeting room and Sunday school. The floor track was fully recessed into the floor, avoiding any trip hazards. The partition incorporated dark stained beading to the vision panels to blend in with the existing church décor.

Specification:

1 No. Type M80 Folding sliding partition with 5 No Glazed vision panels
Rw 35 dB sound rating
Sand and alabaster MFC finish
